**Faculty of Psychology
University of Havana**

Welcome

The Faculty of Psychology of the University of Havana, in the name of science and knowledge, opens its doors to host the XIII International Meeting of Psychology Students. It will be held from May 6th to May 10th, 2024, both face-to-face and virtually.

Some people say that the name Cuba derives from the Taino word *cubao*, which means "where fertile soil abounds". Our event aims to be just that: fertile soil to sow, care, recreate and grow, from the connection between our science and cultures.

To do so, during a whole week, we will have lectures, collective construction workshops with Popular Education methodology, synchronic and non-synchronic presentations of investigations, community fairs and cultural and recreational exchanges. We will be making science for the world and for the construction of a different future.

Psychology student or professional, or from another akin area, we offer you the opportunity to collectively construct with us. Join us and let yourself be inspired by the energy and passion of our community.

This meeting calls to us to become a thread that connects us, to knit a web of solidarity and cooperation. Transcend borders, embrace us, open up to exchanges, to joy, to the will of creating and learning. Let's connect our cultures with threads that can weave some kind of science of our time.

Join this celebration of life!

About our event

The International Meetings of Psychology Students have a long tradition. They are an academic and professional meeting ground of students and experts of Psychology, both from Cuba and other countries, who converge in a place of actualization and exchange of knowledge and experiences from different applied and disciplinary fields.

They are held biannually, since the year 2000. In that time, at the doors of a new century, the students and professors of the Faculty of Psychology of the University of Havana decided to offer a platform of exchange and cooperation to face the increasing challenges of our science and profession, and also our societies. A beautiful tradition started to be woven, held by various generations of students of the almost 300 years old University of Havana. This event is characterized by its singularities and the innovations it introduces in every edition.

- Although it is aimed at Psychology students, from its beginnings we understood the importance of sharing with professionals and academics. This allows students to enrich from the professional world, and allows professionals to keep up to date with the university spirit.
- It is an event specially thought for Meeting, so it combines science with a cultural and recreational program that promotes dialogue beyond work sessions.
- The students are protagonists in its conception and development. It is thought, felt, dreamt and acted by the students of our faculty. This always ensures a fresh and vital event.
- The students are not bare receptors. Besides enjoying the lectures and works from professionals, we can show our investigation experiences and pre-professional practice.
- The event is open to the community. Not only we open our doors so the community can enter our Faculty, but we go to it and make a festivity for human wellbeing.

[2022](#)

If you are a Psychology student or another akin area, attending this event might be valuable because:

- It adds an event to your curriculum, which shows your interest in knowledge and constant learning.
- You can learn from the important psychology exponents that share their researches and experiences.
- It allows you to meet diverse comprehensions and perspectives of the discipline and profession.
- If you wish to, you can present your experiences in your pre-professional formation and receive feedback about it.
- It creates meeting spaces to establish relationships from shared interests.

If you are a Psychology academic or professional, or another akin area, attending this event might be valuable because:

- It is a place of cooperation with national and international professionals.
- It is an opportunity to update your knowledge in different psychology fields.
- It makes possible bonds between theory and practice, between academic and professional lives.
- It enriches your curriculum in both an individual and institutional level.
- For directives in Psychology programs, participating and stimulating the participation of students and teachers is valuable for accreditations, because it is evidence to academic mobility of professors and students.

General Program

Session	Monday May 6th	Tuesday May 7th	Wednesday May 8th	Thursday May 9th	Friday May 10th
Morning	Accreditation	Central workshops Master lectures // Commission work	Central workshops Master lectures // Commission work	Central workshops Master lectures // Commission work	Commission work Specialized visits
Afternoon	Commission work Inauguration act Cultural gala of amateur artists	Nationality fair Master lectures // Commission work	Commission work Great Community Fair	Spontaneous Theater Group of Havana Show Master lectures // Commission work	Closing act
Evening		Visit to Old Havana			Farewell party

Inauguration act

It will begin this edition with a Solemn Act from the Aula Magna of the University of Havana (famous for its historical and artistic values) with the words of the event authorities and a beautiful cultural program.

Cultural gala of amateur artists:

Cultural activity where different artistic manifestations of the solid amateur artists movement of the university will be presented. The delegates who so wish can participate through an artistic manifestation.

Central workshops:

Is one of the new features of our edition. Through the methodology of Popular Education, people who attend the workshops will be able to reflect together (in workteams or in plenary), about central questions about formation, social challenges, use of networks and other topics. It will combine the use of other methodologies, like Psychodrama.

Master lectures:

Lectures are a great gift for the attendees. From the venue or other countries, prestigious professionals talk about the different areas of performance of Psychology and related sciences.

Commission work:

It is the core of the scientific exchange in the event. They are grouped into thematic lines of the event and discussions are organized in the form of panels and workshops. Debate, professional and humane exchange and scientific learning prevail. The spaces are coordinated by students from the Scientific Commission prepared for this purpose.

Nationality fair:

It is an activity aimed to share cultural experiences from the nations present in the event. The delegates can present photos, colloquial phrases, costumes, dances, food and other elements. It is organized in the courtyard of the Faculty of Psychology and it will be open to the community.

Great Community Fair:

It is a place that aims to bring already established projects, ideas in the making or knowledge to action, through interaction with the community and every person that wishes to participate virtually. Its main goals are to promote psychological well-being, foster skills and provide tools to enrich the daily lives of the members of the community where the Faculty of Psychology, the event venue, is located.

Spontaneous Theater Group of Havana:

This group achieves to make the audience the protagonist of the scene, for they are the ones who tell their personal stories and then are represented when the actors perform them.

Especially Visits:

The delegates, after being registered for this activity, will be able to visit health and education centers, among others, where the work of the professional psychologist is present.

Closing ceremony

The Scientific Commission will make a summary of the work made and the event authorities will assess the experience.

Master Lecturers

PhD. Manuel Calviño

Ways to Participate

You can participate as a speaker (presenting some work) or listener. They can both be made face to face or virtually.

Important dates

- Opening of inscriptions and abstracts acceptance: October, 2023
- Abstract submission: until March 1st, 2024
- Abstract evaluation: up to 15 days after its reception
- Last date to make your inscription for your work to appear in the scientific program: March 20th, 2024

I am interested in being a speaker, how do I submit my abstract?

The Scientific Commission will evaluate every work. In order to do so, the contributions must have an abstract, sent via our webpage which can be accessed [here](#).

We accept contributions in Spanish, Portuguese, English and French. You will be able to participate in any of the languages mentioned, but we do not offer simultaneous translation.

Only the authors who are inscribed in the congress receive a participation certificate.

Abstracts must meet the following requirements:

- Title: With no capital letters or quotation marks, except the initial letter and proper nouns. It should convey the main idea of the abstract.
- Extensive abstract: It must contain the necessary information between 1500 and 3000 characters, with the following sections:
 - Empirical investigations: Introduction, Objectives, Method, Results and Conclusions. The subtitles must be included in the abstract. References must not be included.
 - Non-empirical works: Introduction, Objectives, Covered topics, Conclusions.
- Keywords: 3 to 5, separated by commas.

In which modality can I present my work?

As it is a hybrid event, you can participate both face to face and virtually. In the latter, you can choose to make your presentation synchronically or non-synchronically, depending on the modality you choose.

Modality	Content	Time	Presentation
Free works	You can present an investigation, finished or in process. In the conformation of the scientific program, they will be grouped by the Scientific Commission in Thematic Panels with up to five free works each.	Each thematic panel will be an hour long.	Face to face and virtually, synchronically
Electronic posters	Graphic presentation of the results of your work. They can be empirical and non-empirical works, finished, in process or as projects. Also, experiences in pre-professional practice.	Available during the week of the event in a digital space dedicated to it.	Virtually, non-synchronically. We will have a chat where people can exchange about the works.
Podcast or short video	Is a presentation, via an audio or video file, previously recorded, of the results of empirical and non-empirical works, finished, in process or as projects. Also, experiences in pre-professional practice. They will have a duration of 8 minutes.	Available during the week of the event in a digital space dedicated to it.	Virtually, non-synchronically. We will have a chat where people can exchange about the works.
Workshops	They are spaces for collectively constructing about a topic. In them, it will be offered information, practice and knowledge about said topic. Methodologies, methods and work techniques are shared.	They last 120 minutes	Face to face
Book Presentations	It is a space dedicated to the dissemination and analysis of texts published in the field, scientific and academic. The authors have the opportunity to present their publications, highlighting its purpose, the main content and contribution of their work to the field of knowledge.	They last 30 minutes	Face to face and virtually, synchronically
Master Lectures	It's a space where renown personalities exchange about their particular area of expertise. The speakers will be invited by the Organizing Committee.	They last 1 hour	Face to face and virtually, synchronically

Thematic lines

1. *Epistemology, theory, methodology and history of Psychology.*

- History of psychology
- Current challenges of psychology as a science and profession
- Ethics in the practice of psychology
- Test construction: adaptation and validation of instruments

2. *Training in Psychology*

- Current status and challenges of teaching and learning psychology
- Pre-professional practice in the exercise of psychology
- Design and evaluation of academic programs
- Role of students in the design of their training

3. *Experimental and compared psychology*

- Associative learning
- Sensory and perceptual processes
- Comparative cognition
- Problem resolution
- Affection and emotions

4. *Education, subjectivity and human development*

- Human learning: difficulties and challenges
- Role and care of teachers
- Educational and professional orientation
- Coexistence, bullying and violence in educational contexts
- Educational inclusion-exclusion in different subsystems
- Models of diagnosis and

pyschoeducational intervention

- Neurosciences applied to education

5. *Gender studies*

- Gender, theory and methodology
- Gender violence (in couples, employment, schools, public spaces, obstetric violence)
- Gender, health and education
- Gender, economy, employment and work
- Gender and media
- Studies of masculinities

6. *Human health and well-being*

- Quality of life and psychological well-being
- Care and self-care
- Addictions: prevention, care and treatments
- Depression, suicide and self-destructive behaviors
- Psychotherapeutic work with and for adolescents
- Psychological care of patients with chronic diseases
- Health prevention

7. *Psychology in Organizations*

- Conflict resolution and mediation
- Selection and evaluation of personnel
- Occupational health and well-being
- Leadership and organizational development
- Transformation of the organizational culture

8. Community, Social and Politics Psychology

- Peace building, historical memory and reparation of victims
- Migrations and their effects
- Human rights
- Decoloniality and psychology
- Interculture and indigenous people
- Public policies, social movements and sustainable development
- Poverty, inequality and social exclusion
- Work and interventions in communities
- Governance and fourth generation warfare
- Cultural consumption and prosumption and their impact

9. Sports Psychology

- Theoretical principles as applied science
- Psychodiagnostics of theoretical and instrumental value
- The role of the sports psychologist
- Ethical edges of the work of the sports psychologist

10. Psychogerontology

- Social imagery in relation to aging and old age
- Changes and transformations at the bodily, mental and social level
- Education movements in and for the elderly
- Counseling and psychological support for the elderly
- Active aging

11. Neuropsychology.

- Neuropsychological evaluation
- Clinical neuropsychology
- Child neuropsychology
- Neuropsychological rehabilitation
- Learning and neuropsychology

- Psychology and neurophysiology

12. Family

- Family health
- Current family models and their impact
- Family therapy
- Family as builder of peace
- Peaceful coexistence within the family
- Resolution of marital and family conflicts

13. Couples and sexuality

- Public policies, integral education and promotion of sexual health
- Sexual health and sexual rights
- Orientation and sex therapy
- Trans-identities, gender and culture
- Sex work and human trafficking
- Homophobic and transphobic violences
- Current couple models and their impact
- Couple therapy

14. Environmental, emergency and disaster psychology

- Psychology in prevention and coping with environmental deterioration
- Health, well-being and the environment
- Training of psychologists for intervening in disaster situations
- Role of psychology in emergency and disaster situations
- Environmental education and psychology

15. Cyberpsychology

- Telepsychology
- Artificial intelligences in Psychology professional practices
- Social media
- On-line behavior and digital identity
